None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed apparatus as set forth in independent claim 1 that is particularly characterized at least by the claimed "calibrator for calibrating ... swept frequency signal" taken in the overall context of independent claim 1.

Dependent claims 2-5 are allowable for at least the reasons for which claim 1 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed apparatus as set forth in independent claim 6 that is particularly characterized at least by the claimed "self-calibration feedback loop ... comprising ... to the second generator" taken in the overall context of independent claim 6.

Dependent claims 7-8 are allowable for at least the reasons for which claim 6 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed method as set forth in independent claim 9 that is particularly characterized at least by the claimed method step of "calibrating the second generator to reduce the undesired phase discontinuities during switching based upon the wideband swept frequency signal" taken in the overall context of independent claim 9.

Dependent claims 10-14 are allowable for at least the reasons for which claim 9 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed method as set forth in independent claim 15 that is particularly characterized at least by the claimed method step of "calibrating the second generator by comparing the phase ..." taken in the overall context of independent claim 15.

Dependent claims 16-19 are allowable for at least the reasons for which claim 15 is allowable.
